Clic Softbox Octa

Familiarize yourself with Clic

What is Clic?

Clic is our most lightweight and portable range of light shaping tools, specifically designed for the A-series flashes.

The Clic range gives you diverse, easy to use and compact light shapers for all your needs – on the go.

How does Clic work?

The Clic light shapers are mounted quick and easy due to the magnetic setup. The mount has been designed using strong magnets attaching your flash firmly to the light shaper. Note that there is always a possibility of knocking the flash off when it's affected by outer impact. When used in crowded areas, with abrupt or abnormal movements, or repositioning the stand, please take extra precautions and secure your flash.

And before you begin, get to know your Clic Softbox Octa!

**Get started with your new
Clic Softbox Octa**

The **Clic Softbox Octa** is quick and easy to assemble. Unfold the Clic Softbox Octa by retracting the ring upwards until it clicks.

The **Clic Softbox Octa** is just as easy to disassemble when you are done.

Quickly fold by pressing the unlock section.

When used on a stand, tilt the **Clic Softbox Octa** by pressing the trigger and rearrange the softbox according to your preference. The softbox can be tilted both forwards and backwards.

The **Clic Softbox Octa** is made for **Profoto A-series flashes**. Attach your A-series flash to the magnetic mount. Make sure that the flash is correctly inserted and have connection with all magnets and that the surface is clean.

As the Clic system uses magnetic mounts, it is important that each connection is mounted correctly.

When mounted, **get comfortable with the magnetic set up** by shaking it gently to get a feel of the magnetic strength!

The Clic system allows you to stack several light shapers in order to create the effect you need.
Just click them on each other!

To mount different Clics with the **Clic Softbox Octa**, place the additional modifier from the inside of the softbox before unfolding it. This way the magnetic mount is not compromised in any way when mounting your flash to the Clic Softbox Octa.

Do not place any accessories between your light and the Clic Softbox Octa.
